EXAMINER'S AMENDMENT

1. Claims 1-63 are pending.
2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Peter Chu (Registration No. 41,676) on 3 February 2005.

3. The application has been amended as follows:
4. Claims 22-31 are cancelled.
5. Figure 1 is amended to include the label "Prior Art". The approved amendment is shown in Figure 1 of the attached drawing sheets.
6. Figure 2 is amended to include the label "Prior Art". The approved amendment is shown in Figure 2 of the attached drawing sheets.
7. Figure 3A is amended to include the label "Prior Art". The approved amendment is shown in Figure 3A of the attached drawing sheets.
8. Figure 3B is amended to include the label "Prior Art". The approved amendment is shown in Figure 3B of the attached drawing sheets.
9. Figure 3C is amended to include the label "Prior Art". The approved amendment is shown in Figure 3C of the attached drawing sheets .

10. Figure 3D is amended to include the label "Prior Art". The approved amendment is shown in Figure 3D of the attached drawing sheets.

Allowable Subject Matter

11. The following is an examiner's statement of reasons for allowance:

The present application teaches an architectural software framework for creating Web-style application software, including one or more page functions, which communicate via a frame, the application software capable of expanding and interfacing with other Web-style programs. Each independent claim identifies the distinct feature of a frame having a set of frame services including a navigate service and a finish service, the navigate service being invocable by a page function to cause the frame to invoke the activate service of another page function and cause the other page function to perform a task, the finish service being invocable by the other page function to cause the frame to invoke the complete service of the page function. The closest prior art, "Microsoft Inductive User Interface Guidelines" teaches a set of page function services including an activate service and a complete service (the navigational concept called process allows users performing a task to click on a link to a secondary task that moves away from the sequence of screens that make up the primary task, and returning the user directly to the branching point in the original task when the user completes the secondary task) (pages 3-4 and 12) and a frame having a set of frame services including a navigate service and a finish service (displaying user interface pages in a shared frame with tools for moving back and forward through a navigational structure) (page 4). The prior art fails to teach a frame user interface page having a region for showing the user interface page selectively bound to the page function

having a first subset of the set of exposed attributes defining types of information receivable by the page function and a second subset of the set of exposed attributes defining types of information returnable by the page function, the navigate service of the frame being invokable by a page function to cause the frame to invoke the activate service of another page function and cause the other page function to perform a task, and the finish service being invokable by the other page function to cause the frame to invoke the complete service of the page function. Therefore, the prior art fails to anticipate or render the above limitations obvious.

12. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
